Communications: Dirt Devil Prime: 145.585 – Alternate Dirt Devil 1 (146.580)

Trail Description: Holcomb Creek Trail 3N93 (do not confuse it with Holcomb Valley Road 3N16) is one of the more challenging trails in Big Bear. It is a **difficult trail**. There is no single large obstacle. It is made up of a gate keeper at each end, a few smaller but fun rock gardens scattered along the way with a challenging longer rock garden in the middle.

Difficulty: Difficult

Special Equipment Required:

- Front and rear recovery points
- At least one locker (two is better)
- 33” tires and an appropriate lift on a short wheelbase vehicle and 35’s and an appropriate lift on a longer wheelbase vehicle.
- Rock sliders, skid plates or armor will not eliminate the possibility of body damage but may reduce its likelihood or severity.
