

## FREQS FOR THE FREAKS (HAM FREAKS THAT IS)

Postby [DIRTYCJ7](#) » Tue Aug 11, 2015 1:21 pm

The club will use 2m when ever possible. I have found that the Clara repeater system has great local range. The repeater sits up on Santiago peak and I have personally talked to a station on a cruise ship anchored off of Ensenada Mexico. Amazing.

The Clara repeater is our local goto system.  
Frequency is: 145.220 600KHz. - tone 103.5

On the Trail we will be using Club Load Simp 2  
Frequency is: 146.550

Additionally another good repeater that you might want to program in your radio, is the Keller Peak repeater. This repeater is on the peak near Running Springs and covers much of the San Bernardino Forrest area including Big Bear.

Frequency is: 146.385 600KHz. + tone 146.2
