

Calico RR

Run Leader Ron Webber

Tail gunner: Dave and Trish

Rigs 17

Cow bells 2 Nicolle & Katie

Guest rigs 8

Members rigs 9

We ran the loop in reverse going up Duran, where the trail starts off with many small & medium ledges. A guest in a 470 Lexus bent his driver side independent front axle. We dragged him off the trail. He had a spare axle and the tools to replace it (this was not his first time) and he caught up with us at the big water fall.

The big water fall, has been filled with about 3 feet of rocks. Even with 3 feet of rocks it is still difficult. With a lot of help and 2 cowbells everyone got up and over. We stopped for lunch and a few of us tried Danny Delp's (former DD member) extra credit. It is not easy but unlike Danny Delp we made it through earning extra credit points.

By the time we got to Bismark I did not think we had time to go down Odesa. We went down Phillips Drive through Kramer Arch, which is always fun. Then up, over and around the dirt mounds and we got back to camp about 4pm.

I'm sorry we did not get to see the Duran Gate Keeper and the Odessa's pucker pass. Maybe next time.

Another great day on the trail
