	<p>Rick Walter received distress call from information off our web-site. A pickup truck pulling a trailer home was stuck deep in the sand. GPS location 33.672134,-115.794205 off of cottonwood springs Joshua Tree National Park approximately 136 miles to location. The vehicle and trailer was removed from the sand and placed on a dirt road. The young couple are on their honeymoon and had other travel plans and were very grateful for our assistance. This event speaks well for the Dirt Devils of Southern California..</p>
